DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 14 March 2006 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent 6,753,281 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The first paragraph of the specification (containing the related application information) has been replaced with the following paragraph.

- -This is a Continuation-in-Part of Application No. 10/172,997 filed June 18, 2002 now U.S. Patent 6,753,281 issued on June 22, 2004. The entire disclosure of the prior application is hereby incorporated by reference herein in its entirety.- -

Allowable Subject Matter

Claims 1-6 are allowed.

Reason for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art fail to disclose or suggest a glass composition having the composition as recited in the instant claims, which result in the recited properties specifically refractive index, Abbe number, T_g , and devitrification property when held at 920°C for 2 hours.

The closest prior art is deemed to be Japanese Patent Application Publication No. 60-221338 by Inoue. Inoue discloses a similar composition but does not the devitrification.

Art Unit: 1755

Applicants arguments filed 14 March 2006 pages 4-7 and originally Specification, specifically Table 3 show that the glass of Inoue does not have the devitrification as required by the instant claims. The instantly claimed glasses have the recited ranges of components and combined totals for the following three groups 1) SiO_2 and B_2O_3 2) ZrO_2 , Nb_2O_5 , and Ta_2O_5 , and 3) ZnO , CaO , SrO , and BaO AND the devitrification limitation. The glasses of Inoue fail to meet the devitrification limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
